

NOCK — Partnership Target List

Robinhood Chain DeFi Concierge · Prepared July 10, 2026

This list is built from NockFi.io's own stated integrations plus publicly confirmed Robinhood Chain launch and testnet partners. Targets are grouped into four tiers by how directly they unlock a NOCK agent (Swap, Perps, Yield, Stock Token, Vault) versus how strategic and longer-cycle the relationship is.

TIER 1 — DEX / Liquidity & Perps Venues (Swap + Perps Agents)

Category	Project	Relationship to Robinhood Chain	Why It Fits NOCK	Partnership Angle	Agent(s)	Pri.
DEX / Liquidity Venue	Uniswap	Day-one launch partner; dedicated AMM as the chain's primary public liquidity protocol	Deepest liquidity on the chain; Swap Agent should route here by default	API/subgraph access + co-marketing as default execution venue	Swap Agent	5
DEX / Liquidity Venue	Pleiades	Day-one launch partner; proprietary AMM as a primary prop trading venue	Second core liquidity venue; needed for competitive routing	Direct quote integration; explore revenue-share on routed volume	Swap Agent	5
DEX / Perps	Lighter	Live perpetual futures DEX inside Robinhood Wallet on Robinhood Chain	Only venue offering perps on the chain today	API integration for positions, funding rates, one-click open/close via chat	Perps Agent	5
DEX / Perps	Arcus (by dYdX)	dYdX-built venue offering 95 Stock Tokens plus perps at 0% fees	Direct overlap with Stock Token + Perps agents	Routing integration + joint announcement to dYdX's trader base	Stock Token, Perps	4
DEX Aggregator	1inch	Official launch partner supporting Stock Token/ETP trading via app, wallet, swap API	Aggregator logic overlaps with NOCK's routing thesis	Use 1inch swap API as a routing source Robin compares	Swap Agent	4
DEX	Rialto	Listed DEX supporting Stock Token spot trading on Robinhood Chain	Additional venue for price comparison completeness	Basic API/liquidity integration for quoting and routing	Swap Agent	3

TIER 2 — Lending & Yield Infrastructure (Yield Agent)

Category	Project	Relationship to Robinhood Chain	Why It Fits NOCK	Partnership Angle	Agent(s)	Pri.
Lending Protocol	Morpho	Underlying infra for Robinhood Earn (~7% APY USDG lending)	Core rail for Yield Agent; Robinhood's own flagship product	Integrate vaults as default yield destination; co-branded 'Earn via NOCK'	Yield Agent	5
Yield / Risk Curator	Steakhouse Financial	Named support partner on Robinhood Earn's Morpho infra	Risk curation partner; validation layer for Yield Agent picks	Co-develop vetted vault allow-list surfaced by Yield Agent	Yield, Vault Agent	3
Stablecoin / Yield	Ethena	Named support partner in the Robinhood Earn build-out	USDe/sUSDe yield fits Yield Agent's comparison set	List Ethena yield products as a routable option	Yield Agent	3
Lending Protocol	Spark	Named support partner in the Robinhood Earn build-out (Sky/MakerDAO)	Additional lending venue for diversified yield sourcing	Integrate Spark savings/lending rates into comparisons	Yield Agent	3
Lending Protocol	Maple Finance	Named support partner; institutional lending focus	Institutional credit yield differentiates Yield Agent	Integrate Maple pools as a higher-yield tier for larger balances	Yield Agent	3

TIER 3 — Core Infrastructure: Data, Oracle, Custody, Compliance

Category	Project	Relationship to Robinhood Chain	Why It Fits NOCK	Partnership Angle	Agent(s)	Pri.
Blockchain Infra / RPC	Alchemy	Official infra partner on Robinhood Chain (RPC, dev tooling)	Already 'Powered By' NOCK - formalize the technical relationship	Co-marketing as execution infra; potential grants/credits	All agents	4
Oracle / Data	Chainlink	Official oracle; CCIP, Data Streams/Feeds live for Stock Token pricing	Stock Token Agent depends on accurate real-time pricing	Direct Data Feeds/Streams integration for price previews	Stock Token Agent	5
Custody	BitGo	Official custody partner on Robinhood Chain	Relevant for an institutional/custodial tier alongside Privy wallets	Explore optional custodial vault tier for larger accounts	Vault Agent	2
Wallet Infra	Privy	Already 'Powered By' partner; embedded wallet infra (email/social login)	NOCK's onboarding backbone - formalize the relationship	Joint case study onboarding non-crypto-native Robinhood users	Onboarding, Vault	5
Cross-chain Infra	LayerZero	Integrating with Robinhood Chain since testnet	Useful if NOCK expands beyond Robinhood Chain	Explore omnichain messaging for future multi-chain routing	Swap Agent (future)	2
Data / Analytics Infra	Allium	Blockchain data infra integrating since testnet	Could power the 'Onchain Data' layer NOCK already references	Use indexed data feeds for agent decisions & tx previews	All agents	3
Compliance / Risk	TRM Labs	Blockchain intelligence/compliance partner since testnet	Adds transaction screening before Vault Agent execution	Integrate risk scoring into pre-trade compliance checks	Vault Agent	2

TIER 4 — Chain-Level & Strategic Partners

Category	Project	Relationship to Robinhood Chain	Why It Fits NOCK	Partnership Angle	Agent(s)	Pri.
L2 / Chain Infra	Arbitrum (Offchain Labs)	Robinhood Chain built on Arbitrum's stack; \$1M committed to 2026 Open House	Foundational chain partner; grants + visibility channel	Apply for Open House grant funding; joint Buildathon presence	Strategic	4
Chain Owner	Robinhood	Owner/operator of Robinhood Chain; ~28M retail users	Ultimate top-of-funnel partner; featured placement would be transformative	Pursue official 'featured app' / ecosystem-partner listing	Strategic	5
AI Infra	Anthropic	Already 'Powered By' partner; Claude likely powers Robin's reasoning layer	Formalizing strengthens credibility as an AI-native agent product	Explore case-study / Build with Claude showcase	Robin (orchestration)	3
Insurance	Lloyd's of London / RELM	Insurance underwriters for Robinhood Earn's cyber/smart-contract cover	Stronger Vault Agent pitch if positions carry comparable coverage	Explore whether NOCK-routed positions can be modeled on this cover	Vault Agent	2

Source Basis

- Robinhood Chain launch partners (Uniswap, Pleiades, Alchemy, BitGo, Chainlink, 1inch, Rialto, Lighter, Arcus/dYdX): Robinhood Chain mainnet launch coverage, July 2026 ("The World is Flat" keynote).
- Robinhood Earn lending partners (Morpho, Steakhouse, Ethena, Spark, Maple): Robinhood Earn product announcement, July 2026.
- Testnet-phase infra partners (Allium, LayerZero, TRM Labs, Chainlink, Alchemy): Robinhood Chain public testnet announcement, February 2026.
- Arbitrum / Offchain Labs: Robinhood Chain is built on Arbitrum's tech stack; Arbitrum committed \$1M to its 2026 Open House developer program.
- NOCK "Powered By" partners (Robinhood, Arbitrum, Privy, Alchemy, Uniswap, Lighter, Anthropic): pulled directly from nockfi.io.
- This reflects publicly announced partners as of July 10, 2026. Verify current contact handles/emails before outreach.
